DOCK & LOCK® Systems

CA Enabled Cabinet

Government compatible CAC technology ensures prime security to your mobile devices.
DoD CAC, PIV or our PSSI memory cards can be used with an administrator-programmed pin for added security. With PIN programmable permission settings:

- **First Available Mode**
- **Assigned Drawer Mode**
- **Multi-Drawer Mode**

Advanced networking system updates E-Tools as they charge.
With the CA's network switch and CAT6 wiring, even remote administrators can easily install security patches, software updates, and more as optional AC power in each drawer keeps devices charged and ready to go.

New Quiet-Cool Programmable Fan Technology is easy on the ears and the environment.

Cabinet Features

- Government Compatible CAC Technology (DoD CAC and PIV)
- CAC Reader
- Flexible permission settings for multiple users and clearances
- Remote administrator access
