# DOCK & LOCK® Systems

Practical and Secure Storage Solutions for today's mobile computing workforce.

Do you know where your laptops are ?

Your computers are locked up, charged, network connected and ready to go!

pssi®
Plug-In Storage® Systems, Inc.

Secure, powered and connected storage for laptop computers, electronic devices and other applications

BENEFITS

The PSSI Dock & Lock® System is a computer storage cabinet solution to lock up laptops and notebooks. For many organizations, Dock & Lock® cabinets are a part of their mobile computing strategy for secure storage, networking and recharging. Their computers are always ready when needed.

Efficiency = Savings

Dock & Lock® cabinets manage portable computers when not deployed. During this non-deployed time, computers are updated, activity data transferred, maintenance programs run and software updated. All this occurs while the battery is charging and the computer is locked up. The wait is over. Consider the savings when your workers no longer have to wait for work assignments and critical downloads. Computers are ready to go at the start of every shift.

More Cost Effective

A pre-wired Dock & Lock® cabinet is more cost effective than providing individual cabling for AC power and network connections to each computer. The cabinets' sleek design maximize floor space.

Most Versatile

Dock & Lock® customers represent most every industry deploying mobile computing devices: communications, utilities, medical, insurance, manufacturing, administration, government, public safety, law enforcement and the military.

There is a Dock & Lock® cabinet available for your specific needs. Models are available for storing just a few computers, to high density laptop storage, even one you can fit under a desk.

Index

Compact Dock & Lock® Cabinets for Under-Desk and Under-Counter

Dock & Lock® Security Cabinet models 1623-L-5 and 2029-L-7 are ideal for applications requiring secure and powered storage for just a few computers. These cabinets are designed for wireless sites, but can accept network cabling. Because of their compact size, they are ideally suited for locations with limited space such as administrative offices, medical facilites, research centers and laboratories.

Model 1623-L-5, a 5-drawer, 23" high cabinet, ideally fits under a desk top.

Model 2029-L-7, a 7-drawer, 29" high cabinet, ideally fits under a counter top.

Shown with DLW-3 option

Options

• **Model DLW-3 Kit:** Heavy-duty, 3" (76mm) diameter swivel casters provide smooth transport and full maneuverability. Lockable front casters offer additional safety when loading and unloading or parking the cabinet. Mobile Kit adds 4" (102mm) to the overall cabinet height.

• **AC-PW Kit:** AC power cords can be provided to each drawer. All electrical components are UL approved.

• **C6-PW**: Wiring can be provided to each drawer.

• **Custom Switch** quoted and installation is included.

Cabinet Features

• Unique, patented, articulating cable management system to each drawer eliminates tight bending of cables that will degrade performance over time.

• Two fans safeguards against heat build up protecting the longevity and integrity of stored computers.

• Convective ventilation system promotes air circulation and dissipates heat even when the fan is idle.

• Independently locking drawers offer security. Individual key assignment promotes accountability. A master key is provided for management.

• Can be bolted to the desk, counter, floor or wall for added security.

• Equipped with a 125V15A/60Hz Surge Suppression Power Supply. All electrical components are UL approved.

• Sturdy steel construction with durable beige powder paint finish. Multiple knockouts conveniently located for cabling access.

• Heavy-duty, full extension drawer slides with precision ball bearings.

• Sturdy, full width pull handles for easy drawer access.

• Cabinet arrives fully assembled, ready to use.

Custom Sizes or Modifications

PSSI will work with you to design a custom cabinet size, combination of drawer sizes, cabinet color, network cabling, switch installation or other modifications to meet your specific needs.

Versatile 4 to 10 drawer Dock & Lock® Cabinets

Dock & Lock® WideScreen 2052 &1652 Series Security cabinets are our most popular and versatile cabinets. The cabinets are ideal in any business or industrial environment where computers need to be stored in a central location. Model 1525 and 20MB Mobile Base Kit allows you to easily move the computers where you need them for daily use, then roll them back to their secure centralized location.

WideScreen 2052 & 1652 Series cabinets securely store, power and network connect laptops or notebooks, Handheld PCs, IPads, Pocket PCs, field test equipment, radios, PDAs and other energy dependant devices.

Model 2052-L cabinet dimensions are 20" W by 25" D by 52" H. Drawers measure 17.5" W by 20.25" D. Drawer heights measure 3.25" or 4.25".

Model 1652-L cabinet dimensions are 16" W by 25" D by 52" H. Drawers measure 13.75" W by 20.25" D. Drawer heights measure 3.25", 4.25", 5.75" and 8.75".

The 2052-L & 1652-L cabinets can be custom configured with a combination of mixed drawer heights.

4052 & 3252 & 4852

High Density Computer Storage Dock & Lock® Cabinets

Dock & Lock® Series 4052, 3252 and 4852 Laptop Security Cabinets are high density laptop storage cabinets. These Laptop Security Cabinets are ideal for locations that need to manage large numbers of computers, such as operations centers, maintenance dispatch centers, libraries, classrooms and training facilities.

Each laptop cabinet has power for network connections, locking drawers and multiple thermostatically controlled fans for cooling. The laptop cabinet's large base compartment provides racks for mounting switches, routers or hubs, and still has plenty of room remaining for a UPS.

Model 4052-L-20   Model 3252-L-16   Model 4852-L-30

Cabinet Features

- Unique, patented, articulating cable management system.
- Seven to nine fans safeguard against heat build up, protecting the longevity and integrity of stored computers.
- Convective ventilation system promotes air circulation and dissipates heat even the fans are idle.

MU 2352 Dock & Lock® Multi-Use Security Cabinets

Widescreen Laptops · Netbooks · Mini Laptops · Ipads · High Density Storage

The Dock & Lock® Series MU 2352 Multi-Use Security Cabinet is a versatile and cost efficient security product. This Multi-Use cabinet is designed for any application. providing secure, adaptable storage for laptops, netbooks, mini laptops, Ipads, communications systems and other electronic devices.

Optional AC power and network cabling can be wired to each shelf allowing your electronic devices to be powered up, charging and connected to your network. This provides you the ability for remote computer management including installation of security patches and necessary updates.

Photos below show an example of a centralized system setup with a switch, server, laptop and printer. With the addition of the mobile kit, this setup becomes a mobile command center, capable of being deployed wherever it is needed. The MU 2352 provides limitless potential to serve your needs and specifications. As shown below the MU 2352 cabinet is capable of containing 1-10 shelves. This adaptable system provides for up to 12 wide-screen laptops, 30 netbooks/mini laptops, or any configuration necessary. The bottom compartment contains a 19" high, 6U rack for mounting various network switches and a UPS for added protection.

Options

- Up to 10 pull-out shelves depending on your configuration, with optional AC power and network cabling
- Laptop divider system capable of storing 24 laptops
- AC Power to each shelf
- CAT6, Fiber Optic Cabling to each shelf or laptop divider system
- Mobile Wheel Kit

Custom Sizes or Modifications

PSSI will work with you to design a custom cabinet size, combination of drawer sizes, full extension shelves, cabinet color, network cabling and switch installation or other modifications to meet your specific needs.

Cabinet Features

- Single Door with two-point locking system for added security.
- Our patented, articulating cable management system to each shelf.
- 19" high, 6U rack in base compartment of cabinet.
- Four cooling fans.
- Sturdy steel construction with durable powder paint finish.
- Compatible with any make/model of laptop/netbook.
